

LANDSCAPE PROJECT UPDATE

March 22, 2023

Shores Outdoor Solutions has completed the majority of the topsoil spreading throughout the community. 90 yards of topsoil have been placed in ruts and other areas where needed. Thank you to the homeowners who came out and helped direct the crew to specific needs around your units. We have also received a handful of requests for additional fill and attention. We will address the requests over the next few weeks.

We are now turning our attention to patching areas of lawn where topsoil has been placed, as well as addressing dead grass. Please keep in mind that this project is not a complete replacement of grass that is not St. Augustine. As you are aware, the community has many types of invasive grass that has displaced the St. Augustine over the years.

We will do our best to stay within budget and maintain a “green” lawn to the best of our ability. Healthy sod is becoming available, and we will begin the patching process shortly, based on availability and quality.

We will keep you informed as the project progresses.

Thank You,

Tout Management
